SUMMARY

I am Spanish entrepreneur & freelance full-stack developer based in Amsterdam. I have wide command of HTML, CSS, Javascript and PHP, and I'm hoping to find an awesome project in which I can keep developing my coding skills.

I build cross-browser, cross-device, responsive or adaptive websites and web applications; from scratch or helping to improve existing ones. I love using cutting edge technologies, but always having an eye on browser support requirements.

RELEVANT EXPERIENCE

CEO, INFLUXER Marketing

Amsterdam, Netherlands — 2016-Present

INFLUXER is an online marketing consultancy, Influencer Marketing implementation and online content creators representation agency. I created the agency with the goal to meet the needs of both Brands and Influencers in this new-era social media conversation, connecting them and their Audience in a straight-forward way.

Full-Stack Web Developer, HuelamoDev

Amsterdam, Netherlands — 2015-Present

HuelamoDev is my first freelancing project in Netherlands. I deliver on-demand web development and consultancy; building web platforms from scratch and working with existing codebases.

Lead Front-end Developer, Greenhouse Innovation

Amsterdam, Netherlands — 2013-2016

Greenhouse Innovation is a digital platform creation company, They have created and maintain, among others, Snipperwall, a social media content hub and display, and Selly, a CMS-based commercial network for shops and shoppers.

I led the front-end team and succeeded to deliver quality projects and platforms for clients such as ANWB, CBRE, RWS, AJAX, TEDx, ING or KNVB.

Creative Director, Pedro Pablo Duart European Campaign

Madrid, Spain — 2012-2013

I led the creative team of Pedro Pablo Duart's political campaign for the National Assembly of Ecuador in 2013, directing the creation of advertisements, videos and graphic resources and developing the website of the campaign. Achieved the third place for the Europe, Asia and Oceania circumscription.

IT Manager, Web developer @ Embassy of Ecuador

Madrid, Spain — 2011-2013

Managed and maintained a big-size computer network and server, used for file sharing, email server, authentication system and an Apache server for internal applications usage.

Developed their website; designed and developed an intranet web application for the press department, which management used to manage a newsletter and provide coverage for the national press about the events of the Embassy.

Designed, developed and implemented the first Ecuadorian migrant census in Spain as an internal web application for usage in every Consulate of Ecuador in Spain.

Visit my LinkedIn page to get more information about my experience

- **Social media APIs** - Working with Facebook, Twitter, Instagram APIs; managing social apps
- **Collaboration tools** - JIRA, Confluence, Slack, Taiga; usage, management and customisation

SOME MORE INFO ABOUT ME

- Multi-tasking; ambitious
- I keep an eye on every stage of the company; see, listen and analyse; then I bring ideas to the table. I like companies that allow every person to contribute in multiple areas.
- Deliver first, tweak later mentality
- Everything can improve, and I'll find out how; nonconformist.
- Do you create proper documentation in the development phase? I'll love you if you do so
- Quick learner and self taught in most all the areas of my knowledge; I learn by doing; and I'm willing to do
- Lots of experience working with social media; but I'm not really a social media user
- Windows, Linux or MAC... but I'm working on Linux these days

THANKS!

Thank you for your interest. If you like what you read, let's talk!
